DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by O'Brien (US Patent 4,890,693).

O'Brien discloses a method of assembling a knock-down stand at a work site where the stand is displayed, disassembling the stand and storing the components, see column 2, lines 37-38, 55-59 and 63-65. Applicant should note that the preamble has not been given patentable weight. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Allowable Subject Matter

3. Claims 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: Applicant's arguments filed March 24, 2006, as they relate to claim 8, are persuasive, therefore the USC 102 and 103 rejections are hereby withdrawn.

Response to Arguments

5. Applicant's arguments filed March 24, 2006, as they relate to claim 7, have been fully considered but they are not persuasive.

In response to Applicant's argument that O'Brien fails to disclose a critical component of the claimed invention, namely the case for holding the fire extinguisher and the claimed method for using the case, it is noted that the feature upon which Applicant relies (i.e., the claimed method of using the case) is not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Furthermore, although Applicant lists the case as part of the components, however this component does not appear to be a critical component in the method of claim 7 since Applicant broadly recites a "stand" without any other structural limitation that would distinguish it from the "stand" of O'Brien.

In view of the above remarks, the examiner maintains that O'Brien anticipates claim 7.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
